Wayne and Steve

Following review of the groundwater data for the past two years of treatment in the vicinity of LF01-W19, AmecFW has concluded that an additional treatment well is required upgradient of LF01-W19 to increase recirculation and treatment of groundwater primarily in the shallow zone. Please find attached a figure indicating the location for the new remediation well at LF004. In order to take advantage of the drill rig currently drilling at ST012, AmecFW has scheduled to install this well on or about January 7, after drilling SB18 at ST012.
